**Resolution for Approval of the DMATS FY2026
Transportation Planning Work Program
And
Authorization to Execute Planning Contracts with
Iowa and Illinois Departments of Transportation**

WHEREAS, the Dubuque Iowa-Illinois Urbanized Area has been established by the U.S. Department of Commerce, Bureau of Census, to have a population in excess of 50,000, and the East Central Intergovernmental Association (ECIA) has been officially designated as the Metropolitan Planning Organization (MPO) for the Dubuque area and has delegated this function to DMATS; and

WHEREAS, in accordance with the current federal transportation legislation, the MPO has an adopted Long-Range Transportation Plan which: 1) Identifies transportation facilities that function as an integrated transportation system; 2) Includes a financial plan; 3) Assesses capital investment and other measures necessary to preserve the existing transportation system; and 4) Will indicate appropriate transportation alternative activities; and

WHEREAS, the FY2026 Transportation Planning Work Program (TPWP) has been developed with input from the Iowa, and Illinois Departments of Transportation, the Federal Highway Administration and the Federal Transit Administration; and

WHEREAS, contracts will become available from the Iowa, and Illinois Departments of Transportation providing planning funds to DMATS with \$149,988 in PL, and \$61,509 in FTA Section 5305(d) being provided by Iowa; \$51,160 in PL, and \$15,690 in State funds being provided by Illinois respectively for the continuing, comprehensive, and cooperative transportation planning process for the Dubuque Metropolitan Area.

NOW, THEREFORE, BE IT RESOLVED that the DMATS Policy Committee of the East Central Intergovernmental Association approves the FY 2026 TPWP and authorizes the ECIA Executive Director to execute the contracts with the Iowa, and Illinois Departments of Transportation for FY2026.

Adopted on the 8th day of May 2025

Attest:

Brad Cavanagh, Chairperson
DMATS Policy Committee

Chandra Ravada
Interim Executive Director

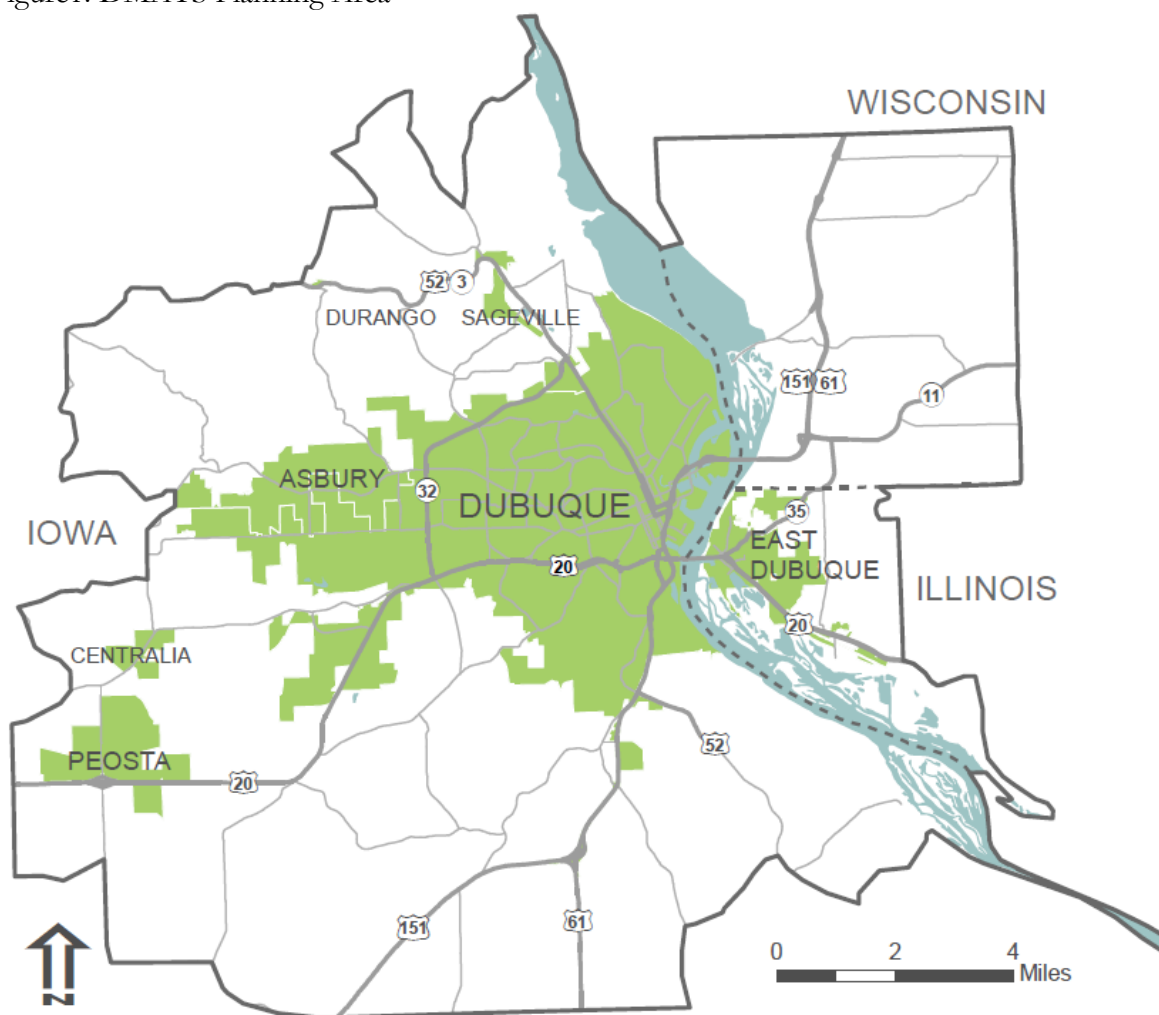

Introduction to Dubuque Metropolitan Area

The Dubuque Metropolitan Area

The Dubuque Metropolitan Area is a tri-state Metropolitan Planning Organization (MPO) located at the boundary intersections of the states of Iowa, Illinois and Wisconsin. The 2020 population for the Dubuque area was 81,073 with approximately 92.7% of the total population living in the Iowa portion of the region. The major transportation routes in, around and through this area include US Highways 20, 52, 61, and 151; all coming to a junction at the base of the Julien Dubuque Bridge over the Mississippi River.

Dubuque is Iowa's oldest city and is among the oldest settlements west of the Mississippi River. Dubuque's early economy developed around lead mining, trading, and river transportation. Over time, the area added a rail transportation center where major railroad companies converged on the Mississippi River banks for easier distribution of product. Highway transportation followed and developed into the major form of transportation in the area. Today the area continues improve quality of life by expanding the region's bicycle and pedestrian network, improving access to public transit, and creating a modern and efficient freight transportation system. Figure 1 maps the DMATS planning area.

Figure1: DMATS Planning Area

The Dubuque Metropolitan Area Transportation Study (DMATS)

The Dubuque Metropolitan Area Transportation Study (DMATS,) composed of both a Technical Committee and Policy Committee, guides the Metropolitan Planning Organization (MPO) for the Dubuque Metropolitan Area. As the guiding entity of the MPO for the three-state (Illinois, Iowa & Wisconsin) Dubuque Metropolitan Area, DMATS is responsible for maintaining a continuous, comprehensive and coordinated (“3-C”) transportation planning process.

DMATS is composed of a broad mixture of local, regional, state and federal officials from all three states; each representing their individual agencies within the region. Local governments represented on the DMATS committees are the cities of Asbury, Centralia, Durango, Dubuque, Peosta, Sageville and Dubuque County in Iowa; East Dubuque and Jo Daviess County in Illinois; and Jamestown Township, the unincorporated town of Kieler and Grant County in Wisconsin. In addition, DMATS has representation from each of the three state Departments of Transportation (Iowa, Illinois and Wisconsin,) the regional councils of government in Iowa (East Central Intergovernmental Association - ECIA,) and Wisconsin (Southwest Wisconsin Regional Planning Commission - SWRPC,) Jule Transit, the Regional Planning Affiliation 8 (RPA 8) Regional Transit Authority, Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA).

DMATS Boundary

The DMATS boundary encompasses surrounding areas most likely to be urbanized within the next 20 years. The DMATS boundary encompasses 207.27 square miles.

Introduction to the Transportation Planning Work Program (TPWP)

The Transportation Planning Work Program (TPWP) outlines the various transportation planning activities to be conducted by the East Central Intergovernmental Association (ECIA) for the Dubuque Metropolitan Area Transportation Study (DMATS) during FY 2026 (July 1, 2025 through June 30, 2026).

This TPWP was developed with input from the following governing agencies:

- DMATS Policy Committee
- DMATS Technical Advisory Committee
- Jule Transit System
- City of Asbury
- City of Centralia
- City of Dubuque
- City of Peosta
- Dubuque County
- Jo Daviess County
- Grant County
- Region 8 RTA
- Federal Transit Administration Region VII
- Transit Advisory Board
- City of East Dubuque
- Iowa Department of Transportation
- Illinois Department of Transportation
- Wisconsin Department of Transportation
- Federal Highway Administration Illinois Division
- Federal Highway Administration Iowa Division
- Federal Highway Administration Wisconsin Division
- Southwest Wisconsin Regional Planning Commission

Guidelines for planning in DMATS by taking into consideration the current federal transportation legislation:

- Provide a transportation planning program addressing major highway, city street, county road, and transit system issues with emphasis on the requirements of the current federal transportation legislation.
- Develop and implement a Long-Range Transportation Plan. Special emphasis should be placed on mainstreaming safety and maintenance of existing system in the Long-Range Transportation Plan and in the planning processes, which will result from the implementation of that plan.
- Stay current on efforts at the federal and state level to identify methods for streamlining the environmental process
- Assist local member jurisdictions and Iowa DOT in any corridor or subarea planning studies, which may be conducted.
- Provide support and technical assistance to local governments and particularly local transit agencies in the area of transportation system management.
- Develop strategies for transportation corridor preservation, road system continuity and spacing, and access control.
- Develop strategies for coordinating land use and transportation development.
- Maintenance of a program for increased citizen/public awareness and involvement in the transportation planning process. Compliance with Title VI of the Civil Rights Act will be accomplished.
- Continuation of a transportation improvement programming process that provides for selecting and prioritizing projects based on objective planning criteria and funding capabilities.

The TPWP encompasses the following:

- clarifies the means of coordination among local units of governments cooperating in the planning effort;
- aids in project development/selection and the allocation of federal, state, and local funding sources;
- establishes the end results/products, purposes, and general methods employed in the conduct of specific work elements; and
- addresses issues and problems affecting modal functions in the urbanized area.

The current federal transportation legislation guidelines for planning

The current federal transportation legislation sets out the following guidelines for planning:

1. Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
2. Increase the safety of the transportation system for motorized and non-motorized users;
3. Increase the security of the transportation system for motorized and non-motorized users;
4. Increase the accessibility and mobility of people and for freight;
5. Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and state and local planned growth and economic development patterns;
6. Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;

7. Promote efficient system management and operation; and
8. Emphasize the preservation of the existing transportation system.
9. Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation
10. Enhance travel and tourism

TPWP Development Process:

The Transportation Planning Work Program (TPWP) outlines various transportation planning activities to be conducted by the staff for the Dubuque Metropolitan Area Transportation Study (DMATS). The TPWP is prepared and adopted each year and contains transportation planning activities for the current fiscal year.

The TPWP Process will include the following steps:

- DMATS staff will start developing TPWP in the month of February, following rules and regulations adopted by the FHWA, FTA and guidance from state DOTs.
- After the draft TPWP is finished, it will be released for a 30-day public review period in March and April.
- Staff will inform the public of the final TPWP's availability by sending notices to the organizations on the DMATS Public Participation Process mailing list and by publishing legal notices in local newspapers and the ECIA website. These notices will be published 4-20 days before the scheduled meeting.
- The public hearing will be held during the DMATS Policy Committee meeting in May. The meeting will be opened for public input during the process.

Organization and Management

The Dubuque Metropolitan Area Transportation Study was established on March 25, 1976 through the adoption of Articles of Agreement by the participating organizations in the area. This cooperative, comprehensive, and continuing transportation planning process was established by agreement between the state and local governments in compliance with Section 134 of the United States Code. The planning process is implemented through a committee structure. All committees forward their recommendations to the Policy Committee for consideration. Each committee's responsibilities are summarized below:

Policy Committee - Responsible for establishing overall policy making decisions related to transportation funding priorities, programming of STBG and Transportation Alternative funds, and monitoring the direction of studies of transportation conditions in the metropolitan area.

Technical Advisory Committee - Reviews, studies, and makes recommendations related to technical issues affecting study priorities and the transportation planning and programming process.

Staff Assigned to work on the Program

Transportation Planning Staff

Interim Executive Director.....	Chandra Ravada
Director of Transportation	Vacant
Senior Planner	Dan Fox
Planner I.....	Jack Studier

Administrative and Support Staff

Finance Director.....	Steve Stoffel
Support Services Manager.....	Sarah Berning

TRANSPORTATION RELATED ISSUES

The unique geography of the DMATS Region provides a variety of natural advantages and challenges for the regional transportation system. The topography of the landscape consists of rolling hills and steep bluffs divided by the Mississippi River. The landscape has impacted how the transportation system has evolved. For example, the street networks in downtown Dubuque and East Dubuque are in the form of a traditional grid pattern. These locations tend to be the areas where settlement first occurred and consist of mostly flat topography adjacent to the Mississippi River. Further from the river, steep bluffs and rolling hills forced communities to abandon the traditional grid pattern in favor of streets that followed the area's natural topography.

The geographic formations of the DMATS Mississippi River region result in unique challenges to the different modes of transportation. Barge traffic is a major mode of freight transportation within the DMATS region. However, barge industry officials consider the Corps of Engineer's 90-year-old lock and dam system outdated, inefficient, and the source of lengthy delays for barge traffic.

While the Mississippi River serves as an important highway for barge traffic and recreation, it also affects the efficiency and safety of the surface transportation system. The US Highway 20 Julien Dubuque Bridge and the US Highway 61/151 Wisconsin Bridge serve as the DMATS region's only river crossings and act as major east-west bottlenecks. The two-lane design of the current Julien Dubuque Bridge presents specific safety and capacity issues on US Highway 20. Currently, an additional bridge is proposed adjacent to the Julien Dubuque Bridge to double the capacity and increase the safety on US Highway 20 over the Mississippi River.

Other challenges in the DMATS area include US Highway 20 corridor from Peosta to the Julien Dubuque Bridge. Insufficient capacity, uncoordinated access management, at grade intersection, steep grades, heavy truck traffic all contribute to the need to improve the safety and efficiency of this major transportation corridor and free flow of freight within the region.

Major Road Issues

Based on the analysis of current and forecasted conditions, the following issues have been identified.

Southwest Arterial – The number one priority for DMATS, City of Dubuque, and Dubuque County. The project is completed and open to public in summer of 2020. The project will have a major impact on region-wide traffic circulation patterns. The interchanges on either side did help in opening access to new industrial development.

US Highway 20 Mississippi River Crossing Capacity Improvement (Julien Dubuque Bridge Parallel Span) – This project is also under study. Due to the impact of this project on the US Highway 20, DMATS should continue to consider it an issue for future planning.

US Highway 20 from Devon Drive to Swiss Valley Road – Two short segments of US Highway 20 from Devon Drive to Swiss Valley Road have already been identified as experiencing traffic problems based on current data. The segment between Devon Drive and John F. Kennedy Road (JFK)/Cedar Cross Road is already over capacity.

East West Corridor Improvements - The U.S. 20 corridor in Dubuque, Iowa is the primary east-west route in the Metropolitan Area, but future traffic projections indicate that U.S. 20 alone will not provide sufficient capacity for east-west travel in the City of Dubuque. To enhance connectivity between the western growth

areas and Downtown Dubuque, additional capacity is needed along alternate east-west corridors. Significant improvements are required for Asbury Road, Pennsylvania Avenue, University Avenue, Loras Boulevard, Fremont Avenue, Kaufmann Avenue, 32nd Street, and North Cascade Road to accommodate future growth and development.

Passenger Rail

DMATS supports passenger rail and will assist IADOT and ILDOT in the return of round-trip passenger rail transportation service from Dubuque to Chicago. In FY 2007 Amtrak completed a study at the request of ILDOT to determine the feasibility of bringing Amtrak service from Chicago to Dubuque. The study showed potential locations for future rail stations in the city. ILDOT is in process of getting the service from Chicago to Rockford and will eventually be connecting to DMATS region. The study was updated in FY 2022.

Transit

The City of Dubuque worked with DMATS to construct an intermodal transit center and a bus storage facility. The projects were funded with a \$10 million State of Good Repair grant and \$2.5 million in DMATS Surface Transportation Block Grant Program (STBG) funds. The intermodal transit center opened in 2015. The bus storage facility was completed and opened to public in spring of 2018.

Air Services

On September 6, 2022, the Dubuque Regional Airport's final flight with American Airlines left the terminal. Air service is a key economic engine for a region, giving residents and businesses access to the global marketplace. Without service, Dubuque, the region is facing an uphill battle to attract and retain businesses. Over the long term, it will struggle to attract additional capital investment and risk falling into a slump that can't be recovered from.

American Airlines has cited the pilot shortage as a main driver for their exit from the Dubuque market. Historically, the pilot training requirements and mandatory retirement age for pilots have hindered the ability to grow and maintain adequate staffing for airlines. At the outset of the pandemic, this issue ballooned as air carriers pushed early retirements, laid off staff, and shrank their offerings due to an extreme curtailment of flights. Now, as air travel has picked up, the market is struggling to rebound and provide a similar level of service across the country.

In response, the Dubuque region has identified the following goals to support the restoration and expansion of air service at the Dubuque Regional Airport:

- Return commercial air service to Dubuque (Specifically, connections to regional hubs and the global marketplace)
- Ensure the long-term viability of DBQ Regional Airport Commercial Service
- Address the pilot shortage issue to ensure the sustainability of the industry long-term

ISSUES FOR THE FREIGHT INDUSTRY

Over the next 20 years, a number of issues will affect the freight industry in the Dubuque region. The following are issues identified by freight industry representatives in a meeting with DMATS staff during the preparation of the Long-Range Transportation Plan.

- Enhance safety on US 20 from Galena to Freeport, aiming for a four-lane highway.
- Improve US 20 in the Dubuque metropolitan area.

- Upgrade the East-West Corridor in the Dubuque metro area.
- Make improvements to the Mississippi River.

DMATS in partnership with Regional Planning Affiliation 8 (RPA 8) and Blackhawk Hills Regional Planning Council (RPC) in Illinois did conduct a multimodal, intermodal freight plan for the eight-county region that enhances the mobility of both people and goods while mitigating the negative impacts on mobility, safety, environment and quality of life. The Plan did help to address all freight issues listed above and make the region gear up to future freight needs.

Mississippi River Transportation

Barge Fleeting - Today, many of the fleeting sites that were identified in the 1985 study are no longer available due to changes in the federal, state and local regulatory environment. Convenient fleeting sites are a key requirement for the operation of river freight terminals like those that occupy the Dubuque harbor area. The terminals only have the ability to load or unload a barge or two at a time. They do not have sufficient bank space on the river to store the barges themselves and typically do not have harbor tugs that can move the barges. As a result, they are dependent on the ability of barge fleeters to bring barges to the terminal quickly from the fleeting sites. Time spent waiting for the barges to arrive from the fleeting sites for either loading or unloading is idle time for the terminal operators and costs them money without accomplishing productive work. The current fleeting sites in the middle of the Dubuque harbor allow barges to be brought to the terminals quickly with a minimum of idle time. If the fleeting sites are moved out of the Dubuque harbor, the travel time required to get the barges from the fleeting sites will impose a severe time penalty on the barge terminals. Due to the slow speed of travel for harbor boats with barges, sites as close as the south end of the Mines of Spain are between ½ day and a full day round trip. The idle time imposed on the barge terminals by such lengthy periods of down time could seriously impair the competitiveness of the river freight industry in the Dubuque region.

Maintenance and Replacement of Lock and Dam System – The extensive system of locks and dams, which make the Mississippi River navigable for freight transportation is aging. The system was built during the 1930's and key components are reaching the point at which they must have repairs. The lock and dam at Dubuque is the 11th down river from the headwaters of navigation at St. Paul, Minnesota. Closing any of the locks and dams below Dubuque for maintenance closes off traffic to Dubuque. Unfortunately, much of the work on the locks and dams cannot be done when the river is frozen. At other times, when the river is not frozen, there is often heavy river traffic which precludes maintenance activities.

Freight Trucks

Truck Delay – Truck delay is one of the most important issues for the truck freight industry because of the coordination requirements of just-in-time delivery. Representatives of the freight industry who met with DMATS staff identified three main sources of delay in Dubuque.

The first is the congestion that exists today on US Highway 20 between Devon Drive and Old Highway Road. The congested intersections on that segment of US Highway 20 and the long waiting time required while cross traffic clears the intersections creates a difficult situation for truck traffic.

The second source of congestion is the result of the at-grade railroad crossings between Jones Street and 12th Street. This area is particularly difficult because it is the main freight center in the region and there are two railroads using the tracks in this area (Canadian Pacific Kansas City (CPKC) and Canadian National (CN) In addition, the area is immediately adjacent and north of the CPKC. As a result, the at-grade crossings are often obstructed by CPKC trains that are either parked as a result of switching activity or are actively switching and causing the crossing gates to drop.

The third source of congestion is the lack of a west side by-pass route for trucks. The two highways most heavily traveled by trucks in the region are US Highway 61/151 south and US Highway 20 west. Currently, the two routes taken through town by automobiles (Cedar Cross Road/Kelly Lane and South Grandview Avenue) most often to get from the west side of Dubuque to the south side are not appropriate for trucks. Only the combination of US Highway 20 and US Highways 52/61/151 south from the downtown area is available for trucks. This route, of course, requires trucks to traverse the segment of US Highway 20 identified as the first cause of delay as stated above.

Railroad Freight

Two Railroads on a Single Track – When US Highway 61/151 was re-aligned in downtown Dubuque in the early 1990's, the Iowa DOT brokered an agreement between Illinois Central Railroad (now CN) and the I & M (now CPKC) Rail Link to share trackage in downtown Dubuque between the two railroads yards. As a result, it is not uncommon for one railroad to be required to wait while the other uses the shared tracks. These waiting delays the railroads and causes scheduling problems. In addition, the trains must sit somewhere while they wait and that results in additional delays at railroad grade crossings.

Replacement of the Illinois Central Railroad Bridge under the Truman-Hobbs Act – The Dubuque railroad bridge will require replacement soon, most likely in the next 10 years, to meet the requirements of the Truman-Hobbs Act. The replacement will be the responsibility of the railroad. However, prior to beginning the replacement, Congress must authorize a payment to the railroad for the bridge at the full depreciated value. This amount will probably be between \$50 and \$75 million. Although both the Union Pacific Bridge in Clinton and the I & M Rail Link Bridge in Sabula are under Truman-Hobbs Act orders, Congress has not yet authorized the funds. As a result, these two railroads have not yet moved forward with replacement plans of those structures.

Two concerns have been raised regarding this event. The first is that the CN will not replace the bridge but simply sell off the portion of its system in Iowa and abandon the bridge. Although that could happen, it does not seem likely that it will because of the connectivity to Omaha and Sioux City. The railroad does not have another crossing over the Mississippi River close by as the next crossing will be in St. Louis, MO and St Paul, MN.

A second concern was related to the possibility that the railroad could be persuaded to construct the new bridge at a different location and free up areas in Dubuque and East Dubuque currently dominated by CN. It does not seem that this will take place because of the limited frontage on the Mississippi River.

Powder River Basin (PRB) project – The MPO has maintained a constant concern about the Powder River Basin (PRB) project, the environmental impact of the coal trains coming into and through Dubuque on the health, safety and welfare of our community. The additional trains will increase traffic delays and could potentially isolate the Ice Harbor area of Dubuque during peak periods of heavy train traffic.

Lack of Rail Accessible Sites and Businesses that Require Rail Access – Another concern for the region is the lack of rail accessible sites and businesses that require rail access. There are many cities that railroads pass through, where they do not stop. If sufficient business were there to merit stopping, the railroads would do so. Over the past 30 years railroad officials indicate that there has been a decline in business in the Dubuque area. This trend is also affected by the trend described above towards rail consolidation and pricing policies, which favor large shippers and long hauls. At some point, officials from the freight industry point out these factors will combine to make Dubuque an unprofitable market for the railroads. When that happens, it will significantly damage the river freight and the truck freight industries in Dubuque due to the inter-relationships between the three modes.

Merger of the Canadian Pacific and Kansas City Southern railroads - The merger is expected to negatively impact DMATS region by significantly increasing the volume of freight train traffic through the region, generating noise pollution and adding to existing safety concerns at 11 at-grade rail crossings in the City of Dubuque, four crossings in Dubuque County, and one crossing in the City of Peosta.

Safe Streets for All (SS4A)

The Infrastructure Investment and Jobs Act (IIJA), also known as the Bipartisan Infrastructure Law (BIL), established the new Safe Streets and Roads for All (SS4A) discretionary program with \$1 billion in appropriated funds to be awarded each year over 5 years. The SS4A discretionary grant program funds are to be awarded on a competitive basis to support planning, infrastructure, behavioral, and operational initiatives to improve roadway safety by significantly reducing or eliminating roadway fatalities and serious injuries through safety action plan development and refinement and implementation focused on all users, including pedestrians, bicyclists, public transportation users, motorists, personal conveyance and micromobility users, and commercial vehicle operators.

The SS4A program provides funding for two main types of grants: Planning and Demonstration Grants for comprehensive safety action plans and Implementation Grants. Planning and Demonstration Grants are used to develop, complete, or supplement a comprehensive safety action plan, as well as carry out demonstration activities that inform an Action Plan. Implementation Grants are used to implement strategies or projects that are consistent with an existing Action Plan. To apply for an Implementation Grant, an eligible applicant must have a qualifying Action Plan.

On Feb. 1, 2023, the Dubuque Metropolitan Area Transportation Study (DMATS) received a SS4A Action Plan grant award to complete a comprehensive safety action plan for 58 cities within the Dubuque Metropolitan and Regional Planning Affiliation 8 (RPA 8) areas. The estimated cost to complete a comprehensive safety action plan is \$492,733 and a local match of no less than 20 percent of the total project cost is required. The Iowa Department of Transportation is not an eligible applicant but has committed to provide \$25,000 (\$12,500 for Dubuque Metro and \$12,500 for RPA 8) in HSIP-Swap funding as a local match. The DMATS will use Institute for Transportation (InTrans) to complete safety analysis and project recommendations of the comprehensive safety action plan.

Following completion and adoption of the comprehensive safety action plan, this plan will provide an opportunity for DMATS and RPA 8 members to seek SS4A Implementation funding to implement strategies or projects that will improve and enhance safety.

Areas of Persistent Poverty Planning Grant

The Jule provides daytime/evening fixed-route and paratransit services, as well as a park-and-ride shuttle for downtown employees. The service area includes Dubuque, Iowa, with a population of 59,119 and East Dubuque, Illinois, just across the Mississippi River with a population 1,489. Dubuque's downtown population in Census Tracts 1, 3, 5, 6, and 7.01 (Areas of Persistent Poverty) is particularly dependent on bus rides to access work, school, shopping, health care, and other destinations.

While the Dubuque region has experienced significant change over the last several decades, the Jule's operations have largely remained the same. Key shifts over the last 20 years include:

- Downtown Dubuque has been changing. Once abandoned, areas like the Historic Millwork District are now fully activated with mixed-use development. New transit routes and services are necessary to connect these neighborhoods to the broader region.
- Dubuque's population is changing in composition. The 2000 Census identified a minority population of 4.6% in the community. In 2020, the non-White population had grown to 16.2%. Dubuque is now home to a growing Hispanic population and roughly 800 Marshallese people. The city's changing demographics demand new approaches to meet the transit needs of all users.
- Manufacturing is reemerging in Dubuque. After the loss of several major employers, the community has witnessed new companies moving into industrial parks on the edge of town. These businesses are urging the Jule to expand transit services to help downtown workers access their sites.
- Dubuque's economy is expanding. Health care, education, tourism, publishing, and financial services are now important sectors of the city's business climate. These companies understand that alternative transportation is an important factor in their ability to attract young talent.
- COVID-19 has disrupted how Dubuque functions. New hybrid telework models have been developed that allow more residents to stay home. As such, the transit system needs to adapt to how, where, and when people are traveling.

With Federal Transit Administration (FTA) Areas of Persistent Poverty funding, Dubuque will conduct a planning study that will help the Jule to optimize bus routes, identify necessary service changes, and determine appropriate equipment/facility needs. An analysis of existing conditions will establish baseline transit services in the region. Robust community outreach will help Dubuque to gather user feedback. A market analysis will help ascertain transit gaps and opportunities for growth. Multiple strategies will be considered and shared with community stakeholders to develop a consensus on needed improvements. Finally, an action plan will be developed that presents specific changes that Dubuque can adopt to enhance transit opportunities for disadvantaged residents in Census Tracts 1, 3, 5, 6, and 7.01.

The proposed project will help Dubuque create a transit model that is reactive to today's demands. The Jule will be evaluated to account for changing demographics, growing business sectors, and new workplace models. Spatial data and feedback from community outreach will help Dubuque to explore social and economic disparities. FTA resources will provide the community with a roadmap to improve public transportation efficiency and ensure the system meets the needs of individuals who lack access to employment, education, health care, and other destinations. The plan will improve transit by identifying where to provide more frequent and expanded service. The project will also support community connectivity, address generational poverty, and help promote spatial justice.

RELATIONSHIP BETWEEN TPWP AND DMATS LRTP & MPO REQUIRMENTS

DMATS Long Range Transportation Plan, creates a policy framework for transportation investments in the DMATS region. The plan recognizes the vision and eight transportation goals to help make progress towards this vision. The 2026 Transportation Planning Work Program (TPWP) is designed to ensure the region focuses time and resources on meeting the DMATS LRTP goals, planning factors and MPO requirements of FHWA and FTA. The table provides how the seven planning tasks meet the above requirements.

		Project #1599 - Overhead and Administration	Project #5329 - General Coordination	Project #5341- Long-Range Transportation Plan (LRTP)	Project #5342 – Transportation Research and Database Management	Project # 5352 - Short-Range Transportation Planning	Project #35370 STREETS
DMATS LRTP GOALS	Manage and maintain the existing transportation system to maximize performance.	X	X	X		X	
	Support an efficient freight system in the region.	X		X		X	X
	Strategically preserve our existing infrastructure and focus future investment in areas that are already served by significant public infrastructure investments.	X	X	X		X	
	Increase the safety, security, and resiliency of the transportation system.	X	X	X	X	X	X
	Protect and enhance the natural environment and support energy conservation and management.		X	X	X	X	
	Improve the transportation system and promote efficient system management and operations.		X	X	X	X	
	Provide a high degree of multi-modal accessibility and mobility for individuals. This should include better integration and connectivity between modes of travel.		X	X	X	X	X
	Ensure that transportation system performance improvements are distributed.	X	X	X		X

RELATIONSHIP BETWEEN TPWP PROJECTS AND FEDERAL PLANNING EMPHASIS AREAS

At the discretion of the Secretary of the Department of Transportation, FHWA and FTA may jointly establish planning emphasis areas (PEA) to advance national goals as established by federal law to reflect priorities and respond to congressional direction established through the appropriations process. PEAs are intended to highlight subjects that should be addressed in FHWA and FTA funded planning programs. PEAs are designed to encourage the application of planning assistance to studies addressing national goals and priorities, in addition to goals and priorities directly benefiting local transportation operations or otherwise serving state and local needs. In their letter dated December 30, 2021, FHWA and FTA jointly requested MPO's, State DOT's, Public Transportation Agencies, and Federal Land Management Agencies to emphasize the planning emphasis areas (PEAs) in their work programs. These PEAs remain in effect until superseded by newer PEAs. Each PEA is shown below along with the specific actions included in the 2026 UPWP that address that PEA.

System Preservation - The DMATS Transportation plan focuses more on preserving existing infrastructure and focusing future investment in areas already served by significant public infrastructure investments, discouraging infrastructure expansion. All transportation improvement projects in the region aim to conserve and upkeep the current system, thus ensuring the preservation of existing Vehicle Miles Traveled (VMT) and Vehicle Hours Traveled (VHT). The DMATS Travel Demand Forecast Model helps develop and analyze data (#5341 – Long Range Transportation Planning – DMATS TPWP).

Complete Streets – Review current policies, rules, and procedures to determine their impact on safety for all road users. This effort should work to include provisions for safety in future transportation infrastructure, particularly those outside automobiles.

The DMATS addresses Complete Streets through the following activities:

- Special Projects - One of the goals of the RPA 8 Regional Transportation plan is to Build a multi-modal transportation system. This should include better integration and connectivity between modes of travel. The projects funded through DMATS STBG program like University Ave Extension, 14th Street Overpass, John Deere Improvements do accommodate complete streets (Project #5352— Short-Range Transportation Planning —DMATS TPWP).
- SS4A -The Safe Routes and Streets for ALL plan for all cities in the DMATS region (Project #35373 – Safe Streets and Routes for All (SS4A) -DMATS TPWP).
- Coordination - DMATS staff coordinates with Bike Groups, Multi-Disciplinary Safety Teams (MDST), and IADOT for regional projects and issues. The feedback and proposed solutions contribute to the development of regional transportation plans. (Project #5352— Short-Range Transportation Planning —DMATS TPWP).

Public Involvement – Increase meaningful public involvement in transportation planning by integrating Virtual Public Involvement (VPI) tools into the overall public involvement approach while ensuring continued public participation by individuals without access to computers and mobile devices.

The DMATS addresses Public Involvement through the following activities:

- TAG Group - Serve as a stakeholder on the Transit Action Group (TAG) and contribute to the production and distribution of agendas and meeting notifications for quarterly TAG meetings. (as needed) (Project #5352— Short-Range Transportation Planning —DMATS TPWP).
- Bike and Pedestrian – Meeting with interest groups in the DMATS area to seek input on the Nike and Pedestrian plan development and implementation process (Project #5352— Short-Range Transportation Planning —DMATS TPWP).
- Quiet Zone Study and Safety Improvements – Staff are seeking input from DOTs, the public, Cities, County, and railroads in the region to complete Quiet Zone Study and Safety Improvements. (Project #5352— Short-Range Transportation Planning —DMATS TPWP).

Data in Transportation Planning – incorporate data sharing and consideration into the transportation planning process because data assets have value across multiple programs.

The DMATS addresses data in Transportation planning through the following activities.

- Land-Use and Comprehensive Planning Activities – DMATS assists local communities with Land-Use and Comprehensive Planning Activities, while also gathering information from local agencies to inform the planning process for the DMATS region (Project #5352— Short-Range Transportation Planning —DMATS TPWP).
- Intelligent Transportation System (ITS) improvements – DMATS engages in ITS improvements and transportation technology projects within the region, integrating this information into the regional planning process (Project #5352— Short-Range Transportation Planning —DMATS TPWP).
- Passenger Transportation Plans – DMATS collaborates with transit systems in the region to evaluate transit needs through the Transportation Action Groups (TAG), incorporating this data into the regional planning process (Project #5352— Short-Range Transportation Planning —DMATS TPWP).
- Transportation Research and Database Management – DMATS staff consistently gather and analyze data from numerous government entities in the region. This includes transportation related data such as traffic counts, transit ridership, accident statistics, and expenditure details for maintaining and expanding transportation infrastructure. These datasets are stored in databases at ECIA and play a vital role in the regional planning process. (Project #5352— Short-Range Transportation Planning —DMATS TPWP).

For Iowa, FHWA Metropolitan Planning (PL) program funding is transferred to FTA 5305d program funding in a consolidated planning grant application. Total programmed FHWA PL funds is \$149,988, of which \$149,988 is carryover from the previous fiscal year.

For Iowa, FHWA Surface Transportation Block Grant (STBG) program funding is transferred to FTA 5307 program funding in a separate FTA transfer grant application.

Work Elements

1. Project #1599 - Overhead and Administration

Background:

ECIA General Management has conducted association operations under direction of its governing council and committees since the origin of the association since 1976. Adequate and necessary administration support and overhead have been provided as part of this activity.

Program Objective:

Conduct ECIA operations in conformance with proper business practices and provide necessary overhead to conduct transportation planning.

Program Activities:

Provide overhead and administration throughout the fiscal year. Examples of costs include personnel costs associated with the administration of the agency, office supplies, insurance, telephone expense, postage and equipment, agency fiscal management, utilities, rent, and data processing services (continuous).

Cost: Total- \$ 112,775, Iowa - \$90,488

Staff Hours: Total -1,163, Iowa - 933

Previous work done in FY 2025:

- Held Ten Tech and Policy Committees meetings (July 2024 – June 2025).
- Held one joint special meeting with Iowa DOT staff.
- Staff meetings were held, and timesheets were reviewed for accuracy.
- Office supplies, insurance, telephone expense, postage and equipment, agency fiscal management, utilities, rent, and data processing services.

2. Project #5329 - General Coordination

Background:

Staff has served as liaison between DMATS and state and federal agencies pertaining to specific transportation issues. Staff provides local support to the 3C process in the DMATS area.

Program Objective:

- To provide general urban transportation planning and coordination in the tri-state DMATS area.

Program Activities:

- Undertake the general transportation planning, coordination and cooperation with local, state, and federal representatives consistent with the Federal 3C Transportation Planning

requirements including an emphasis on public involvement (continuous).

- Review new legislation and inform local agencies of development of federal transportation legislation (as needed).
- Conduct special studies as directed by the DMATS Policy Committee with input from the Technical Advisory Committee (as needed).
- Support DMATS committees through staff assistance, research, and communications among the committees and various other levels of government. Include citizen/public involvement in the MPO's planning process (as needed).
- Provide technical assistance to other governmental agencies or organizations involved in the overall transportation efforts identified by DMATS (as needed).
- Monitor the changes effected by Congress (continuous).
- Attend and participate in meetings of national, state, and local organizations like Mississippi River Trail (MRT), Transit Action Group (TAG), etc. relating to transportation planning; and, apply knowledge to local planning program (continuous).
- Attend and participate in meetings of national, state, and local organizations that emphasizes Coordination of Human Service Transportation (continuous).
- Organize and participate in meetings of DMATS Policy, Technical Advisory, and other committees; and attend other committee and board meetings as needed (continuous).
- Manage the financial side of the TPWP in a way that ensures sound and efficient program administration (continuous).
- Work with USDOT and the states of Iowa, and Illinois to update the DMATS Public Participation Policy to insure compliance with the latest directives from FHWA and FTA related to Public Involvement (continuous).
- Prepare the FY 2027 TPWP in cooperation with the Iowa, Illinois, and Wisconsin Departments of Transportation (will be completed by June of 2026).
- Participate in Iowa DOT Quarterly MPO meetings (continuous).
- Participate in Illinois DOT Quarterly MPO meetings (continuous).
- Participate in Iowa MTMUGS Quarterly meetings (continuous).

Cost: Total - \$ 22,301, Iowa - \$19,331

Staff Hours: Total – 230, Iowa- 199

Work done in FY 2025:

- Working with the city of Dubuque in implementing RAISE grant received to conduct design and engineer the construction of a railroad overpass, Complete Street enhancements, and new shared-use paths supporting the economically-distressed North End, Point, and Washington neighborhoods.
- Working on Phase I & Phase II Smarter Travel project with IADOT and the city of Dubuque.
- Staff supervision.
- Worked with Illinois passenger rail collation and consultant on a passenger rail feasibility study between Rockford and Dubuque
- Monitored implementation of FY 2025 TPWP and facilitated revisions as needed
- Developed FY 2026 DMATS budget and prepared FY 2026 TPWP
- Attending Trail vision, TAG, Air quality, MRT and Ride the rail meetings.
- Attending IADOT, and ILDOT quarterly and annual meetings
- Attending Iowa MTMUGS

3. Project #5341- Long-Range Transportation Plan (LRTP)

Background:

Efforts in FY 2026 are focused on maintaining DMATS 2050 Long-Range Transportation Plan (LRTP) and continue updating the Travel Demand Forecast Model and continue work on developing DMATS draft 2055 Long-Range Transportation Plan (LRTP).

Program Objective:

- To maintain the LRTP and to collect, update, analyze, and provide transportation data (e.g. socio-economic, land use, travel) information to be used in the metropolitan planning process.
- Continue development of DMATS Geographic Information System (GIS).
- DMATS staff will also be involved in the coordination and collection of data on an as needed basis with each of the three DOTs.
- Staff will assist in integrating LRTP with state wide plans developed by the State DOTs.
- Update existing DMATS model
- Maintain DMATS 2050 Long-Range Transportation Plan (LRTP)
- Have socioeconomic data projected to 2055
- Complete draft chapters for the 2055 LRTP
- Conduct public participation

Program Activities:

- Maintain approved DMATS 2050 Long-Range Transportation Plan.
- Ensure the region's Long-Range Planning process addresses the federal transportation planning factors (continuous).
- Develop policy directions for the DMATS region's 2055 Long Range Transportation Plan.
- Assess impact of policy choices on regional transportation system, land use, development and the financial capacity to guide decision making (continuous).
- Process amendments to LRTP 2050 as necessary (as needed).
- Travel Demand Model will be maintained and updated (continuous).
- Perform model runs and analyses and produce reports (continuous).
- Alter transportation networks as necessary to reflect current and anticipated results (as needed).
- Assess data requirements to support potential model enhancements (as needed).
- Coordinate all model improvement/update efforts with the Iowa DOT, Systems Planning Bureau (as needed).
- Monitor the local land use plans and their implementations as they impact development on the metro area transportation system (as needed).
- Facilitate efforts by the Iowa DOT looking at concerns regarding corridor management implemented through local land use plans (as needed).
- Stay current on efforts at the federal and state levels to identify methods for integrating the environmental process with the transportation planning process (continuous).
- Work with other MPOs to identify methods for early incorporation of environmental analysis into the project planning process (as needed).

- Assist with other studies and projects recommended in DMATS 2050 LRTP (continuous).
- Participate in Mississippi River Trail (MRT) development as a member of Iowa's MRT Executive Committee (as needed).
- Will participate on Dubuque Area chamber of commerce's Transportation group (continuous).
- Help in developing and maintaining evacuation plan for the DMATS area for the future (as needed).
- Continue to work on planning elements issues of the DMATS 2050 LRTP and create annual performance measures report (continuous).
- Continue to work with DOT and Transit staff in developing safety performance measures and adaptation of MPO safety targets, Bridge and Pavement conditions on the National Highway Systems (NHS) Freight performance on the NHS and Transit Asset Management (TAM) (continuous).
- Work on socioeconomic projections and draft chapters for DMATS 2055 LRTP.
- Work on conducting public participation for the DMATS 2055 LRTP.

Cost: Total - \$ 81,644, Iowa - \$62,500

Staff Hours: Total – 842, Iowa - 644

Work done in FY 2025:

- Ensured the region's Long-Range Planning process addresses the federal transportation planning factors.
- Working on Travel Demand Forecast Model for DMATS 2055 LRTP.
- Coordinated all model improvement/update efforts with the Iowa DOT, Systems Planning Bureau (as needed).
- Continue to work on planning elements issues of the DMATS 2050 LRTP and create annual performance measures report.
- Continued to work with DOT staff in developing safety performance measures and adaptation of MPO safety targets Bridge and Pavement conditions on the National Highway Systems (NHS) and Freight performance on the NHS.
- Completed the network file, Transportation Analysis Zones (TAZ) files, and parcel data file for DMATS 2055 LRTP.
- Currently, working on establishing goals for the DMATS 2055 LRTP.
- Currently, in the process of gathering information from local agencies regarding future growth areas in the region.

4. Project #5342 – Transportation Research and Database Management (Ongoing Process)

Background:

To have a complete understanding of transportation and travel behavior in the region, DMATS staff regularly collects and analyzes data from various government organizations in the region. Data pertaining to transportation is routinely tracked and reported such as traffic counts, transit ridership, and accident data; and expenditures of funds for maintenance and expansion of transportation facilities are kept on databases at ECIA. Documents produced by the states and local jurisdictions that include data on transportation within the region are kept in the transportation department.

Program Objective:

- To collect, maintain and analyze data on transportation within the DMATS area for facilitating transportation planning and decision making.
- To use information derived from analysis of data in modeling and other activities to promote national transportation planning.
- To promote better understanding of transportation patterns and trends among member jurisdictions and general public.
- To maintain data on demographic composition to support spatial justice, outreach and analysis.
- To respond to requests for information from local, state and private agencies and members of the public.

Program Activities:

- Process data collection from membership organizations (continuous).
- Monitor data sources (continuous).
- Maintain databases and documentation (continuous).
- Disseminate data and/or analysis to DMATS member jurisdictions, other interested agencies and general public (as needed).
- Maintain the Transportation Department Library within ECIA (continuous).
- Maintain the GIS system with updated information for future analysis and graphical representation (continuous).
- Collect data needed for Safe Streets and Routes for All (SS4A) continuous).
- Conduct traffic counts for Cities and counties (as requested)
- Providing input on traffic studies (as needed)
- Provide VMT data to City of Dubuque (as requested)

Cost: Total -\$6,850, Iowa -\$3,750

Staff Hours: Total – 71, Iowa - 39

Work done in FY 2025:

- Working on data collection for Dubuque County Emergency Management Plan

5. Project # 5352 -_Short-Range Transportation Planning (Ongoing Process)

Background:

Staff is working with local, state, and federal staff and policy makers in the planning and funding of development work for highway and bridge work for projects such as Northwest Arterial & US 20 improvements, the US 20 Mississippi River Crossing, and the bike/pedestrian network. Staff is writing grant applications for Regional Transit Authority (RTA) used in the procurement of funds for marketing.

Program Objective:

- To work with DMATS members in street/highway and bike/pedestrian transportation planning.
- To provide technical support, grant administration, and planning assistance to the Jule Transit System.
- To prepare and manage the four-year multi-modal Transportation Improvement Program (TIP) for the DMATS area consistent with federal and state guidelines and regulations.
- To update TPMS with revisions, amendments and new federal aid projects within in DMATS area on Iowa side.
- To assist the state Departments of Transportation with administration for projects under development.

Program Activities:

- Work and assist Iowa DOT with the US 20 Capacity Improvements, Northwest Arterial Project and the Julien Dubuque Bridge Project (as needed).
- Work and assist the city of Dubuque and Dubuque County with federal aid Projects, with assistance from the Iowa DOT (as needed).
- Work with the city of East Dubuque and Jo Daviess County representatives and Illinois DOT in the development of transportation improvements in the East Dubuque-Dunleith Township area (as needed).
- Provided technical assistance to locals on implementing lands use and zoning plans (as needed)
- Work with the public transit providers in the DMATS area and interested private sector providers in developing and implementing service coordination strategies for Jule transit and RTA. DMATS is working with the transit providers to have the recommendations implemented (on-going).
- Work with Dubuque County and the city of Dubuque on John Deere Road improvements.
- Attend and participate in Dubuque Regional Airport master plan update.
- Attend and participate in Transit Advisory Board meetings (continuous).
- Assist the transit operators in complying with all applicable federal requirements (continuous).
- Work with local transportation agencies to implement transportation management and operations systems (continuous).
- The PTP plan was completed in May of FY 2025. Staff will maintain the plan in FY 2026 working with the TAG group. DMATS will submit the minutes of these meetings to the Systems Planning Bureau. A Full PTPs will be submitted to Systems Planning Bureau every five years and will continue on the same schedule (as needed).
- The development of the FFY 2027-2030 Transportation Improvement Program (TIP) will be done in cooperation with the member governments in the DMATS urban area. The program will be developed cooperatively by the DMATS committees, the Iowa, Illinois, and Wisconsin Departments of Transportation, local units of government, and participation from the public (completed by June 2026).

- Evaluate potential STBG and Transportation Alternative projects for TIP development using DMATS LRTP and DMATS model (continuous).
- DMATS will assist Jule Transit and the ADA Advisory Committee in implementing the provisions of the Jule ADA Plan (as needed).
- DMATS staff will be assisting local governments with route location designation, signing route segments, usage, and coordination with MRT Inc and the Iowa MRT Executive Committee (as needed).
- DMATS staff will be working with Bi-State Regional Commission, IADOT, ILDOT, RPA 8 ,local governments and State representatives on established Port Statistical Area and Ports of Eastern Iowa (as needed).
- Provide technical assistance in the land use and environmental service area, including comprehensive land use planning, development ordinances (e.g. zoning, subdivision etc.), and environmental assessments and their impact on the transportation system (as requested).
- Serve as stakeholder on Passenger Rail and Bike/Hike Trail Steering Committees and help in printing and mailing the agendas and meeting notices for committee meetings. Staff is actively participating in these group activities for FY2026 (on going).
- Participate in the Air quality group created by MPO, Greater Dubuque Development (GDDC) and City of Dubuque (continuous).
- Assist in documentation for grant applications (as needed).
- Prepare or assist with Title VI compliance report (as needed).
- Work with local emergency planners, law enforcement agencies, and appropriate transportation agencies to analyze and improve the security of metropolitan transportation facilities. Facilitate the Dubuque Multi-disciplinary Safety Group (continuous).
- Help Cities and Counties in Federal and State grants (as needed).
- Participate in ITS improvements and projects related to transportation technology (on going)
- Participate in transportation improvement projects like East-West Corridor improvements (on going)
- Work on a Bike and Pedestrian plan for the MPO region. (on going)
- Work with MPO members, CN, CP, BNSF, FRA, IADOT and ILDOT on implementing Quiet Zone study and Safety improvements.

Cost: Total -\$ 136,310, Iowa - \$117,560

Staff Hours: Total – 1,179, Iowa - 986

Work done in FY 2026:

- Acting as a lead agency for air quality group and create a PM 2.5 path forward plan for DMATS area.
- Conducted two MDST meetings.
- Worked with City of Dubuque, Dubuque County, IADOT District 6 and Grant wood scenic group.
- Working with the city of Dubuque on the East West Corridor project.

- Working with the city of Dubuque on Northwest Arterial project.
- Working with the city of Dubuque and Iowa DOT on US 20 and Northwest Arterial intersection.
- Working with the city of Dubuque and Dubuque County on freight rail issues.
- Working with Dubuque County on road projects.
- Working with Dubuque County on John Deere Road improvements.
- Working on FFY 2026-2029 TIP
- Amended FFY 2025-2028 TIP
- Attending bike meetings.
- Attending rail meetings.
- Attending MDST meetings.
- Attending Iowa DOT meetings
- Attending Illinois DOT meetings.
- Conducting project base meetings for trail projects.
- Working on Smart Zoning project.
- Working on Quiet Zone study.
- Worked with the City of Dubuque on a RAISE grant.

6. **Project #5353– Increasing Safe and Accessible Transportation Options (Ongoing)**

Background:

BIL § 11206(b) requires MPOs to use not less than 2.5 percent of PL funds on Complete Streets planning activities.

Program Objective:

To increase safe and accessible options for multiple travel modes for people of all ages and abilities, which, if permissible under State and local laws.

- Adoption of Complete Streets standards or policies; (see BIL § 11206(a)... the term “Complete Streets standards or policies” means standards or policies that ensure the safe and adequate accommodation of all users of the transportation system, including pedestrians, bicyclists, public transportation users, children, older individuals, motorists, and freight vehicles.)
- Development of transportation plans to...
 - Create a network of active transportation facilities, including sidewalks, bikeways, or pedestrian and bicycle trails, to connect neighborhoods with destinations such as workplaces, schools, residences, businesses, recreation areas, healthcare and childcare services, or other community activity centers;
 - Integrate active transportation facilities with public transportation service or improve access to public transportation;
 - Create multiuse active transportation infrastructure facilities (including bikeways or pedestrian and bicycle trails) that make connections within or between communities;
 - Increase public transportation ridership; and
 - Improve the safety of bicyclists and pedestrians.

- Regional and megaregional planning (i.e., multi-jurisdictional transportation planning that extends beyond MPO and/or State boundaries) that address travel demand and capacity constraints through alternatives to new highway capacity, including through intercity passenger rail.
- Development of transportation plans and policies that support transit-oriented development.

Program Activities

- Work with rural and urban transit systems on transit gap analysis.
- Work with RTA on increasing ridership.
- Work with the cities with DMATS region on updating Safe Routes to School plans.
- Implementation of Bike and Pedestrian programs within DMATS region.

Cost: Total - \$ 10,229, Iowa - \$6,250

Staff Hours: Total – 105, Iowa - 64

Work done in FY 2025:

- Working with RTA on data analysis for ridership.
- Working with DMATS members on potential Transportation Alternative Program (TAP) projects.
- Participating in the city of Dubuque Safe Routes to School group.

7. Project #35370– Smart Traffic Routing with Efficient and Effective Traffic Signals (STREETS) PHASE II (will be completed by June 2027)

Background:

The STREETS project is designed to develop a smart, next-generation, traffic management and control system that will use traffic control strategies to enable dynamic traffic routing to maximize the use of existing roadway capacities in the Dubuque Metro Area. PHASE I is designed to address the primary system and major corridors and PHASE II is designed to address the downtown region.

Program Objective:

The proposed system should reduce wear and tear on major corridors in the Dubuque metro area by distributing traffic more evenly throughout the metro area. It is also expected that the system will reduce congestion, shorten travel times, and improve safety in the metro area. By rerouting traffic on the roads with extra capacities dynamically, it is expected that the proposed system will reduce/eliminate some of the traffic bottlenecks. As an auxiliary outcome of the system operations, the City staff will use the proposed system to identify future projects that will improve safety and reduce congestion in the metro area. Finally, the system will help to measure the effectiveness of safety and congestion projects. This project is one of a kind and will become a replicable model for small urban areas such as Dubuque with populations under 100,000. The project has \$1.97 million in federal and state funds that will be used to hire a third party to develop the project. These funds will not be part of DMATS budget. The funds listed in DMATS budget will be used for staff time on the project.

Program Activities:

- Project management.

- Work with consultant on
 - Microsimulation Traffic Model (MTM);
 - Adaptive Signal Control Technology (ASCT); and
 - Decision Support System (DSS).
- Monthly reports to IADOT.
- Project implementation
- Work with Stakeholder group and consultant to meet the project goals.

Cost: Total - \$ 46,875, Iowa - \$46,875

Staff Hours: total – 483, Iowa - 483

8. Project #35371– SMART GRANT (will be completed by June 2026)

Background:

The STREETS project is designed to develop an open interface to deliver near real-time transportation information directly to vehicles over the cellular network.

Program Objective:

The project will develop a comprehensive data set (including congestion, road closures, railroad crossing blockages, crashes, traffic signal timing, special events, parking, weather, etc.) for the entire Dubuque metropolitan area, integrate the data in a standardized format, build appropriate intelligence to define distribution limits for each piece of data, and develop an open interface to provide this data in near real time via cellular connections to original equipment manufacturers (OEM), infotainment system providers, and other third-party data stakeholders. The project will revolutionize how transportation data is collected, shared, and utilized.

Program Activities:

- Project management.
- Work with consultant on a data set that includes congestion, road closures, railroad crossing blockages, crashes, traffic signal timing, special events, parking, weather, etc.
- Quarterly reports to USDOT.
- Preparing application for project implementation
- Work with Stakeholder group and consultants to meet the project goals.

Cost: Total - \$ 37,500, Iowa - \$37,500

Staff Hours: total – 387, Iowa – 387

9. Project # – IL35 Special Planning Research project - Staff Charges (will be completed by June 2026)

Background:

On Septemebr.1, 2023, the DMATS received a State Planning Research grant award to complete ITS needs on the Illinois side for non-signalized areas that can help connect Sinsinawa Ave, US Highway 20 East, and IL Highway 35 to the STREETS project.

Program Objective:

The funds will be used to develop an ITS device and a communications solution to provide travel times and alternative route information for the East Dubuque area in Illinois and the southwestern tip of Wisconsin. The Dubuque STREETS system will monitor and control these new devices.

Program Activities:

- Finalize funding agreements with ILDOT
- Make sure the project is on track with the timeliness• Work with the consultant and make sure all deliverables are met
- Provide quarterly reports on the progress of the project
- Work with the consultant on Monthly reimbursements and project coordination
- Request monthly reimbursement request to ILDOT with staff activities, and consultants activities
- Work with a consultant to coordinate final Investment Alternatives• Provide input to consultants on "Pre" Service Development plan.
- Work with consultant and local staff to provide input for ITS Improvements
- Conduct work sessions with the consultant and other members within the MPO.
- Presentations to MPO board on study progress and recommendations

Cost: Total - \$ 26,600, Iowa -\$0

Staff Hours: Total – 274, Iowa - \$0

Work done in FY 2025:

- Forming a Steering committee with State and local officials.
- Initial project Kick off meetings with all agencies.
- Biweekly project coordination meetings.
- Project administration.
- Project reporting and reimbursement process with ILDOT.

10. Project # – IL35 Special Planning Research project - Consultant Charges (will be completed by June 2026)

Background:

On September 1, 2023, the DMATS received a State Planning Research grant award to complete ITS needs on the Illinois side for non-signalized areas that can help connect Sinsinawa Ave, US Highway 20 East, and IL Highway 35 to the STREETS project.

The lack of ITS infrastructure in the Illinois portion of the MPO is a pressing issue. If a traffic incident occurs on or near the US Highway 20 bridge over the Mississippi River, the current ITS system, as it stands, will be able to react to the traffic situation on the Iowa side of the river, dynamically rerouting traffic onto alternate routes. However, the system would not be able to do the same on the Illinois side of their river, where there are currently no traffic signals or other ITS infrastructure in place, highlighting the urgent need for improvement.

A traffic incident on the bridge could cause significant traffic delays on US Highway 20, one of the

region's most important commercial corridors between Illinois and Iowa.

The project study will help us assess ITS needs on the Illinois side for non-signalized areas that can help connect Sinsinawa Ave, US Highway 20 East, and IL Highway 35 to the existing ITS project. This assessment will help secure equipment and install it to help dynamically reroute traffic from the US 20 bridge to the Wisconsin bridge through IL35 during congestion, construction, and events.

Program Objective:

The funds will be used to develop an ITS device and a communications solution to provide travel times and alternative route information for the East Dubuque area in Illinois and the southwestern tip of Wisconsin. The Dubuque STREETS system will monitor and control these new devices.

Program Activities:

- **Task 1: Project Management**

Purpose:

- The ITS Improvement Assessment project involves interfaces, systems, and personnel/departments within the City of Dubuque and East Dubuque (The City), State of Iowa, State of Illinois and private companies. The ability to maintain project coordination and schedule will require a focused effort.
- The objective of this task will be to provide project leadership that encompasses managing resources, tasks, project schedule, costs, and keeping the City of East Dubuque, IDOT, WisDOT and The City of Dubuque involved and informed throughout the project lifecycle.

Inputs:

- Contract
- Scope of Services
- Parsons Proposal
- Parsons Project Management-PM policies and procedures
- Illinois DOT project management team

Approach:

- Conduct kickoff meetings with the East Dubuque, Dubuque, IDOT and WisDOT to discuss management approach including clarification of scope, expectations, and any project interrelationships
- Review the City's ITS program and schedules
- Update Project Schedule
- Provide monthly project status reports via meeting that include:
 - Status Summary
 - Issues/Risks updates
 - Progress Assessment
 - Activities Performed
 - Deliverables Completed
 - Updates to project schedule.
 - Coordinate delivery of project deliverables.

Deliverables:

- Project Status Reports and invoices
- Specific Issues and Actions Report
- Risk Assessment updates

- Monthly Project Schedule
- Project Work Plan updates

Assumptions:

- Bi-weekly status meetings via Teams
- On-site staff will be available as needed to ensure smooth progress of the project
- Project Status Reports
- Specific Issues and Actions Report
- Monthly Project Schedule
- Project Work Plan updates

- **Task 2: Operational Review of Dubuque STREETS and ITS Device placement workshop**

Purpose:

- The city will use the developed Dubuque STREETS system as is. No additional functionality will be required. Operations of Dynamic Message Signs, vehicle detection systems and CCTV cameras will be through the same interfaces with no customization.

Inputs:

- Dubuque STREETS system

Approach:

- Parsons will lead up a 1/2 day workshop to cover the basics of the STREETS system developed
- An additional 1/2 day workshop will discussion preliminary ITS device placements for cost effective operations

Deliverables:

- Operational walkthrough of Dubuque STREETS and preliminary ITS device placement

Assumptions:

- The Workshop will be held on site at the City with the ability for IDOT, and WisDOT to attend via TEAMS meeting.
- The City will coordinate the use of a City conference room with adequate size and AV.

- **Task 3: Communications Assessment**

Purpose:

- An important aspect of any Automated Traffic Management System (ATMS) deployment is the communications with the field Infrastructure, Parsons will review the city and state ITS communication and field infrastructure. The team will assess the potential need for communications improvements if needed to support the new system. Based on our initial discussions with The City, we anticipate the need for wireless and/or cellular installations for device monitoring and control.
- Cellular, Fiber, and Wireless options will be evaluated. Bur consideraton for Fiber will be limite to the potential use of third party leased fiber if it makes sense.
- Managing security and accessibility for all users.
- Managing and configuring secure access to the appropriate external systems, public and private.
- Long-term configuration management and debugging relative to STREETS devices and future C2C communications.

- The communications assessment will set the baseline of current conditions and provide technical input for the design of any new ITS field elements, as well as provide guidance for the future resolution of any issues related to the integration of ITS field devices. Parsons will review, documents, previous agreements, analyze the existing communications environment, planned updates and modifications and clarification of IT policy, regulations, and technical understanding in support of the STREETS solution functions.

Inputs:

- City of East Dubuque, IDOT and WisDOT Policies and Practices
- Legacy Systems
- Existing Inventory Data
- Communications Infrastructure
- Technical Environment
- STREETS Software
- Existing agreements
- City of East Dubuque Required Resources
- DMS/VDS/CCTV review and planning workshop output to finalize locations

Approach:

- Review system requirements with the City.
- Review inventory documentation for existing equipment and software.
- Central facility and limited field reviews
- Identify and detail all implementation states for existing or planned projects
- Develop Communications Issue resolution plan for any potential deficiencies.

Deliverables:

- Technical Assessment and inventory documentation updates.
- Communications Plan used to guide final design.

Assumptions:

- Any existing ITS field equipment and communications infrastructure is in good working condition
- Any new switches, fiber and firewalls required due to existing equipment that needs to be replaced would be provided by the PS&E contractor
- Existing communications diagrams are available as applicable
- City will work with Parsons to perform coordinated communications testing if needed.

- **Task 4: ITS Field Infrastructure Design**

Purpose:

- As part of the project the Parsons team will determine the location and specifications ITS field devices and communications network as determined in Task 2. Signs will be placed at key decision points to optimize the potential for the use of alternate routes. Sizing of the signs will be based on Manual on Uniform Traffic Control Devices (MUTCD) Section 2L.04 Design Characteristics of Changeable Message signs Standard 06, unless otherwise approved by the City and State.

- As being proposed for the Dubuque STREETS project, we anticipate that there will be two possible types of signs, full DMS and DMS inserts for travel times to target locations on fixed signs. Final locations, and types of signs will be coordinated with the City.
- This task will also include the design and installation of other miscellaneous ITS field infrastructure as is determined to be needed such as Vehicle Detection Systems and CCTV to be needed to support the efficient operation of the entire system, or as requested by the City.
- Parsons will develop a PS&E bid package in coordination with the City and DOTs for all of the determined ITS field infrastructure. A 30% (Preliminary Location Layouts), 90% and final PS&E package will be provided.

Inputs:

- City of East Dubuque and IDOT Policies and Practices
- Legacy systems
- Existing inventory data
- Communications infrastructure
- Technical environment
- STREETS Software
- City of East Dubuque ITS standards
- ITS device field review and planning workshop output to finalize locations of devices

Approach:

- Review requirements and potential locations with the City.
- Finalize ITS equipment locations
- Develop final communications design plan to accommodate proposed ITS devices and any future system enhancements (if desired by the City and State).
- If additional equipment is needed in the field to support the project, Parsons will work with the City to develop the specifications for City approval
- For additional field equipment, the City will approve Change Orders that are developed with Parsons on a case-by-case bases. Approved Change Orders will include enough technical details to define the Task and any equipment needed, as well as a cost estimate for the task.

Deliverables:

- PS&E plans for communications infrastructure and ITS device installations
- Complete bid documents as required by IDOT
- Change order writeups
- Deliverables in accordance with approved Change Orders.

Assumptions:

- Current costs are based on 4 DMS signs, 9 VDS stations and 4 CCTV cameras and communications network to support and connect to the Dubuque STREETS system.
- Any changes in the assumed quantities will need to adjust the PS&E package costs
- The City staff will work with the Parsons Team to support integration testing and end to end system testing as needed.
- Plans will be provided in accordance with IDOT specifications and Special provisions.
- A separate WisDOT PS&E package will not be required.
- Plan sheets will be based on google maps arial photos. No based map development will be required, and no survey work will be provided.
- No soil borings or surveys will be provided.

- Portable DMS may be used instead of fixed DMS if IDOT or WisDOT require surveying, an environmental assessment, or soil borings to install the fixed DMS.
- Parsons will not be required to provide an environmental assessment.

- **Task 5: Streets System Set up and ITS device integration**

Purpose:

- East Dubuque and IDOT will operate on the installed Dubuque STREETS system. The City of Dubuque will allow for remote access by East Dubuque and IDOT as needed to monitor and access the devices in the East Dubuque area. User access and control will be defined by agency and may need an IGA for operations between the entities.
- We have learned from experience that each agency has their own policies and procedures relating to the deployment and management of their software systems, communications infrastructure, and network security. As a result, we always allow for coordination among the different agencies.
- Implement all system hardware and software if needed. It is assumed a VPN connection will be provided, but additional firewalls or software may be needed to meet agencies requirements.
- All ITS devices on the Illinois, or WisDOT side of the system will be integrated and testing during this task. This task can run concurrently as with the field installation of devices and coordination installation contractors.

Inputs:

- Task 2 through 4 outputs
- City or Parsons Receiving Facilities of Shipped Hardware, or access to the city's virtual environment
- Facility Availability Schedule
- Interface Communications to Field Devices

Approach:

- Set up VPN environment if needed or use existing
- Requires coordination with City staff for initial setup.
- Perform unit confirmation testing and field integration testing for new ITS devices.
- Coordinate initial communications, system, and device integration testing
- Complete integration with initial center and field networking.

Deliverables:

- Base system components include:
 - VPN Access to Dubuque STREETS system
 - Access to necessary iNET™ modules to operate ITS field devices
 - Access to all ITS field elements installed
 - Unit test confirmation/ approval
 - Integration testing results.
 - Fully functional system through the Streets ATMS that provides travel times, and alternative route information through the STREETS ATMS to the DMS

Assumptions:

- The initial system properties, and parameters will be setup by Parsons based on input from the City.
- Any new equipment needed for the VPN or communications will be provided through the construction contract of the City. No equipment will be purchased as part of this project.

- No client side computers will be provided through this contract. Any user PCs that are needed will be provided through the construction contract or by the City.
- No new servers or video cards will be provided through this project. Any user servers, or video cards that are needed will be provided through the construction contract or by the City.
- Any required COTS package upgrades or additions will be purchased by the City or through the construction project.
- Any ongoing system support will be provided through a separate agreement, and is not part of this project.

- **Task 6: Training and Documentation**

Purpose:

- Parsons will provide training at the completion of the system access and device integration.
- The provided manuals will be based on our core iNET™ Manuals with modification to reflect the specific details of the Dubuque STREETS system.
- We expect to provide two separate 2-hour user training sessions. We will coordinate with the City to determine the best time and location for this training. Unless otherwise restricted, we expect to provide the initial training onsite at a City facility.

Inputs:

- Completed Initial Installation
- Completed device integration

Approach:

- The Training Plan will be tailored for up to 2 user groups
- Training Course Syllabi and support materials will be included
- Training material will be provided in hard and electronic format
- Initial training will be held on site at a City facility
- Two separate 2 hour user training sessions will be provided.
- Subsequent training may be provided online

Deliverables:

- Training Plan
- Course Syllabi and Support Documentation
- Hard and soft copy training material
- Manuals are updated with each build

Assumptions:

- The City will assist with training logistics.
- The City will ensure appropriate computers and communications are available to training locations, ideally this will be one computer per trainee, but they can also share a computer if needed
- The costs for subsequent training and documentation updates after the initial build may be included as part of an approved Task Order

Cost: Total -\$ 150,000, Iowa -\$0

Staff Hours: Total -1,364, Iowa – 0

Work done in FY 2025:

- Initial project Kick off meetings with all agencies.

- Needs assessment with agencies.
- Field reviews by design team lead of potential locations.
- Review of communications.
- Most of the 30% plans were completed.

Total Program Cost for DMATS: \$ 609,118

PROJECTS COMPLETED IN FFY 25

11. Project #35372 – Dubuque County BUILD grant Administration (will be completed by July 2025)

Background:

Dubuque County received Better Utilizing Investments to Leverage Development (BUILD) Transportation Discretionary Grants for Northwest Arterial/John Deere Road Corridor.

Program Objective:

The project is designed to address the following:

- Bring the Northwest Arterial into a state of good repair with resurfacing, rehabilitation, and minor reconstruction;
- Realign and signalize W. John Deere Road and the South Parking Lot Drive to create a four-legged intersection with S. John Deere Road, with consideration to large truck turning movements and pedestrian crossing provisions;
- Add a southbound lane from W. John Deere Road to south of Peru Road to accommodate through traffic and provide a climbing lane for large, slow vehicles heading south from Peru Road toward the Northwest Arterial, U.S. Route 52, and Iowa Highway 3;
- Build turn lane improvements at the Peru Road and S. John Deere Road intersection, with consideration to large truck turning movements and provisions for future signalization; and
- Make geometric improvements, including adding turn lanes and signalization of the intersection of U.S. Route 52/Iowa Highway 3 and W. John Deere Road.
- Develop a multi-use trail along the south side of W. John Deere Road to connect the John Deere factory with the Proving Grounds Recreation Area, the Heritage Trail, Heritage Pond and the Northwest Arterial Trail.

Program Activities:

DMATS staff will help Dubuque County with the following activities:

- Working with FHWA and IADOT on BUILD Contract (on going)
- Working with IADOT on SWAP funding contracts (on going)
- Design selection team for RFP process and get it approved by IADOT (completed)
- Design RFPs for Design and Construction Engineering (completed)
- Writing council memos for RFPs approvals (completed)

- Working with City/County and go through the consultant selection process (completed)
- Negotiate contract with consultant once the consultant is approved by IADOT and City/County (completed)
- Implement Contact and start participating in biweekly meetings. Make sure the consultant or the City/County are following IADOT/FHWA regulations (on going)
- Process monthly reimbursements and provide paper work to the City/County to process the reimbursements (on going)
- Maintain a balance sheet for the City/County with different funding sources. (on going)
- Do monthly, Quarterly, Semiannual and Annual reports to FHWA through RADS (on going)
- Other actives as needed (like addressing National Environmental Policy Act (NEPA), right of way issues if the consultant wants to deviate from approved NEAP and ROW boundaries) (on going)

Program Activities in 2024:

- Working with FHWA on amendments to Grant Agreement
- Working with Dubuque county on Reimbursements
- Participated meetings with Dubuque County supervisors and John Deere staff
- Submitting quarterly reports to FHWA

12. Project #35373 – Safe Streets and Routes for All (SS4A) -Staff (will be completed by June 2025)

Background:

On Feb. 1, 2023, the DMATS received a SS4A Action Plan grant award to complete a comprehensive safety action plan for DMATS and RPA 8 area. The project received \$24,000 (\$12,000 for DMATS and \$12,000 for RPA8) from the IADOT Highway Safety Improvement Program (HSIP)-SWAP funding to conduct the plan.

Program Objective:

The funds will be used to develop, complete, or supplement a comprehensive safety action plan. The goal of an Action Plan is to develop a holistic, well-defined strategy to prevent roadway fatalities and serious injuries in a locality, Tribe, or region. Planning and Demonstration Grants also fund supplemental planning and/or demonstration activities that inform the development of a new or existing Action Plan. The Department encourages including demonstration activities in an application.

Program Activities:

1. Crash comparison data for data collection from 58 cities
 - Data collected for input. The data will include Crash data (previous five years for cities with a population of 5,000 + population, previous ten years for cities with a population less than 5,000 population)
 - Existing Safe Routes to School
 - Existing walking and bike information
 - Equity information
 - Template

- MAP with existing data
 - Information collected from the city.
- 2. Data collection from public
 - Data collection from the public through online surveys
 - Building an interactive map where the public can go and provide input on safety issue locations
 - DMATS staff will update the interactive map with each city's input.
- 3. Data compilation for INTRANS
 - Data collected from each city will be provided to INTRANS
- 4. Creating a template
 - Staff will develop a template for the plan.
- 5. Formation of Multi-Disciplinary Safety Team (MDST) groups at each county
 - Form MDST groups in each county. The MDST group includes EMS, County, Big city representation, Small city representation, safety teams (PD, sheriff, IADOT, etc.), School districts, and special groups (Bike and Ped, Parent groups, etc.)
- 6. Information on different types of safety issues and the cause of these issues
 - Update the website and ARC GIS online with this information.
- 7. Developing vision, Goals, and Objectives
 - Staff will conduct a work session with DMATS board and come up with Vision, Goals, Objectives, and performance measures based on data provided by INTRANS.
 - Staff will provide the draft Vision, Goals, Objectives, and performance measures to MDST groups at each county for their input.
- 8. Provide improvements and costs
 - Staff will provide all cities with approved project information and seek public input at council meetings and a resolution accepting the improvements.
 - Address any concerns expressed by cities on the improvements.
 - Update the website and ARC GIS online with this information.
- 9. Draft Plan
 - The draft plan will be open to the public for comments. Staff will seek input from
 - Clerk groups
 - Mayor groups
 - MDST groups
 - DMATS
- 10. Final Plan
 - Staff will get DMATS board to approve to adopt the Plan
- 11. Applications
 - Staff will work with DMATS, MDST groups and cities to get applications ready for SS4A implementation grant with the help of INTRANS staff.

12. Grant Administration and FHWA Reporting

- Staff will administer the grant.
- Provide monthly, quarterly, and semi-annual reports.

Program Activities in 2025:

- Project going through IADOT closing process.
- Quarterly reports submitted to FHWA.
- Project is planned to be done and closed by June 2025.

13. **Project #35373 – Safe Streets and Routes for All (SS4A) -InTrans (will be completed by June 2025)**

Background:

On Feb. 1, 2023, the DMATS received a SS4A Action Plan grant award to complete a comprehensive safety action plan for DMATS and RPA 8 area. The DMATS and RPA 8 entered into a contract with Institute for Transportation (InTrans) for assistance with engineering.

Program Objective:

The funds will be used to develop, complete, or supplement a comprehensive safety action plan. The goal of an Action Plan is to develop a holistic, well-defined strategy to prevent roadway fatalities and serious injuries in a locality, Tribe, or region. Planning and Demonstration Grants also fund supplemental planning and/or demonstration activities that inform the development of a new or existing Action Plan. The Department encourages including demonstration activities in an application.

Program Activities:

1. Crash comparison data for data collection from 58 cities
 - INTRANS staff will participate in all meetings. They will be remote for cities below 5,000 population and in persons or the rest of the cities.
2. Creating a template
 - ECIA and INTRANS staff will develop a template for the plan.
3. Information on different types of safety issues and the cause of these issues
 - Update the website and ARC GIS online with this information.
4. Developing vision, Goals, and Objectives
 - INTRANS staff will participate in these meetings and provide their input.
5. Developing improvements and cost estimates for each location
 - INTRANS staff will take the Vision, Goals, Objective, and performance measures and develop improvements to address safety issues and costs for each improvement.
6. Provide improvements and costs

- INTRANS staff will provide improvements and costs for all locations to DMATS and MDST's groups and seek their input.
 - The improvements will include engineering, education, enforcement, technology, etc.
 - INTRANS staff will work with ECIA staff to develop a ranking process and present it to DMATS and MDST groups for their input and approval.
7. Ranking and group projects
 - INTRANS staff will take the approved ranking, rank the locations, and group them based on the type of improvement or range of improvements.
 8. Approval of Ranking and group projects
 - INTRANS staff presenting to DMATS board and MDST groups on project ranking and grouping and seeking their input and approval.
 9. Draft Plan
 - INTRANS staff will be compiling a draft plan with the information provided by ECIA and INTRANS staff.
 10. Applications
 - ECIA Staff will work with DMATS, MDST groups and cities to get applications ready for SS4A implementation grant with the help of INTRANS staff.

Program Activities in 2025:

- Project implementation and testing
- Biweekly coordination meeting
- Quarterly updates to IADOT and FHWA
- Project administration and reimbursement process.

ECIA Cost Allocation Plan

General

The Cost Allocation Plan of ECIA is the basis of assigning costs to all projects during each fiscal year. Under the plan, the total costs assigned to each project are comprised of both direct and indirect costs. All direct and indirect costs are further identified as to personnel and non-personnel costs. The distinctions of cost allocation are described in the following definitions:

Definitions

Direct Personnel Costs are costs of all personnel activities identifiable to specific projects. Examples of Direct Personnel Costs include personnel time spent on planning activities, administration of housing assistance and Community Development Block Grant Programs. (see Schedule A)

Direct Non-Personnel Costs are the costs of non-personnel items or service clearly incurred by specific projects. Direct non-personnel costs include project related items such as contracted services, data processing, project report publishing, reproductions, travel, supplies, reference materials, staff development, long-distance telephone calls, project audit fees, project inspection fees, advertising, postage, memberships, and other costs similarly identifiable to specific projects. (see Schedule B)

Indirect Personnel Costs are costs of all personnel activities that are not identifiable to specific projects but support all project activities. Examples of Indirect Personnel Costs include personnel time spent on producing the Unified Work Program, policy meetings, and agency general and fiscal management. (see Schedule C)

Indirect Non-Personnel Costs are the costs of all non-personnel items or service that are not directly attributed to specific projects but rather are attributed to overall operation of the agency including all projects. Indirect non-personnel costs include such items as office rent, equipment rental, base telephone and overall agency long-distance calls, postage, advertising, travel, staff development, insurance-bonds, office supplies, reproductions-publications, agency memberships, reference materials, agency audit, and other such costs similarly attributed to total agency and all project support. (see Schedule D)

Cost Allocation to Projects

Each project that is active during the fiscal year receives an allocation for costs as follows:

- A. Direct personnel costs for the month
- B. Direct non-personnel costs for the month
- C. A share of all indirect costs for the month

The monthly share of indirect costs charged to each project is determined by the ratio of each respective project's direct personnel costs relative to the total direct personnel costs of all projects. Monthly timesheets are maintained by all agency personnel and serve as the basis for such allocations.

Schedule A - Direct Personnel Activities

Schedule B - Direct Non-Personnel Costs

Schedule C - Indirect Personnel Activities

Schedule D - Indirect Non-Personnel Costs

Schedule A	Schedule C
Direct Personnel Activities	Indirect Personnel Activities
Transportation Planning and Grant Administration	Unified Work Program
Transit Planning and Grant Administration	Project Notification and Review
Regional Development	Policy Meetings
Local Comprehensive Planning	Filing and Library System
Housing Assistance Programs	Census Program
Community Development Block Grant Contract Administration	Agency Information Maintenance
Community Technical Assistance	Agency Newsletter
Contracted Services	Agency Fiscal Management
Leaves for personnel involved in direct activities	Agency General Management
	Leaves for personnel involved in indirect activities
Schedule B	Schedule D
Direct Non-Personnel	Indirect Non-Personnel
Project-related Office Supplies	Overall Agency Office Supplies
Project-related Operating Materials, Books	Overall Agency Operating Materials and Books
Project-related Conference and Training Expenses	Overall Agency Conference and Training Expense
Project-related Business Expense	Overall Agency Business Expense
Project-related Printing and Binding of Publications	Overall Agency Printing and Binding of Publications
Project-related Insurance and Bonds	Equipment Rent and Maintenance
Project-related Professional Memberships	Overall Agency Insurance and Bonds
Project-related Telephone Expense	Overall Agency Professional Memberships
Project-related Postage and Shipping	Office Utilities
Project-related Advertising	Base Telephone and Overall Agency Cellular and Long-Distance Services
Project-related Professional Services	Overall Agency Postage and Shipping
Project-related Equipment	Office Rent
	Overall Agency Advertising
	Overall Agency Professional Services
	Overall Agency Equipment

DMATS Public Participation Program

The DMATS public participation is a living document and will be reviewed annually by DMATS staff to determine if revisions are necessary. The public participation plan is last approved in October of 2024.

Notification of Documents

The following describes the notification process for the materials that shall be made available, the process of documenting the input received, public hearings conducted as part of the development, updates, and amendment processes for the TIP, PTP, LRTP, TPWP and other public documents created by MPO that needs public hearing.

- *Public Notice*
A public notice announcing a scheduled public hearing shall be published in a newspaper of general circulation in the DMATS area and DMATS website (<http://www.eciatrans.org/DMATS>). These notices will be printed 4-20 days before the scheduled meeting.
- *Press Releases*
Press releases announcing scheduled public hearings shall be provided to community newspapers throughout the DMATS.

Printed – Graphical Material

Any printed or graphical material that is available shall be provided by either DMATS staff or the appropriate agency upon request.

Public Comments

Copies of all public comments received prior to the hearing shall be provided by either the DMATS staff at or before the public hearing. A summary, analysis, and report on the disposition of the comments received shall be prepared and made available upon request.

Accommodation:

Meetings, public hearings, and DMATS formal events are held in facilities that are accessible by persons with disabilities. Public notices of ECIA meetings and events include a notice of location for public. Individuals with disabilities will be provided with accommodations to attend the meetings on request with a minimum of a week notice. Individuals requiring special material or presentation formats will be asked to contact the staff at least a week before the meeting.

Amendments:

TPWP amendment will be necessary when a new work item is added.

An amendment will require the following steps:

- Staff will begin the amendment process by conducting public review at ECIA office. Staff will inform the public of the proposed amendment by sending notices to the organizations on the DMATS Public Participation Process mailing list and by publishing a legal notice in the local newspapers and the ECIA website. These notices will be printed 4-20 days before the scheduled meeting.
- The public hearing will be held during the DMATS Policy Committee meeting. The meeting will be opened for public input during the process.
- The state DOTs will be provided with the updated amendment.

Revisions:

TPWP revisions will be necessary when there are minor changes to project description and dollar amounts.

- Staff will update the DMATS Policy Committee and Technical Advisory Committee on the revised item and notify the state DOTs of the changes.

Waiver of approvals from FTA, FHWA & IADOT

Waiver of approvals

All work program changes require prior written Federal approval, unless waived by the awarding agency. [2 CFR 200.308](#) outlines different types of revisions for budget and program plans, and this [FHWA memo](#) summarizes revisions that require prior Federal approval, as well as other miscellaneous actions and allowable costs that require prior Federal approval.

Types of TPWP revisions that require Federal approval include, but are not limited to, the following:

- Request for additional Federal funding.
- Transfers of funds between categories, projects, functions, or activities which exceed 10% of the total work program budget when the Federal share of the budget exceeds \$150,000.
- Revision of the scope or objectives of activities.
- Transferring substantive programmatic work to a third party (consultant).
- Capital expenditures, including the purchasing of equipment.
- Transfer of funds allotted for training allowances.

Types of revisions that require Iowa DOT approval include:

- Transfers of funds between categories, projects, functions, or activities which do not exceed 10% of the total work program budget, or when the Federal share of the budget is less than \$150,000.

Types of revisions that require DMATS approval include:

- Revisions related to work that does not involve federal funding.

Revision and Approval Procedures

- All revision requests from MPOs and RPAs should be submitted electronically to the Iowa DOT Systems Planning Bureau. Four hard copies of the revision shall also be sent to Systems Planning, which will be forwarded to the DOT District, FHWA, and FTA for review and any necessary approvals.
- Revision requests shall, at a minimum, include:
 - A resolution or meeting minutes showing the revision's approval.
 - Budget summary table with changes highlighted/noted.

- Modified section(s) of the plan's work elements with changes highlighted/noted.
- Revisions where **FHWA/FTA** is the designated approving agency shall require written approval by FHWA/FTA prior to commencement of activity, purchasing of equipment, or request for reimbursement.
- Revisions where the **Iowa DOT Systems Planning Bureau** is the designated approving agency shall require written approval by the Iowa DOT Systems Planning Bureau prior to commencement of activity or request for reimbursement.
- Revisions where the DMATS is the approving agency shall be approved by the Policy Board.
- Notification by the approving agency will be in writing.

PERFORMANCE MANAGEMENT AGREEMENT BETWEEN ECIA AND IOWA DOT

On May 27, 2016, the final rule for statewide and metropolitan transportation planning was published, based on current federal transportation legislation. As part of this final rule, 23 CFR 450.314 (h) was amended to state:

1. The MPO(s), State(s), and the providers of public transportation shall jointly agree upon and develop specific written provisions for cooperatively developing and sharing information related to transportation performance data, the selection of performance targets, the reporting of performance targets, the reporting of performance to be used in tracking progress toward attainment of critical outcomes for the region of the MPO (see §450.306(d)), and the collection of data for the State asset management plans for the NHS for each of the following circumstances:
 - i. When one MPO serves an urbanized area;
 - ii. When more than one MPO serves an urbanized area; and
 - iii. When an urbanized area that has been designated as a TMA overlaps into an adjacent MPA serving an urbanized area that is not a TMA.
2. These provisions shall be documented either:
 - i. As part of the metropolitan planning agreements required under paragraphs (a), (e), and (g) of this section, or
 - ii. Documented it in some other means outside of the metropolitan planning agreements as determined cooperatively by the MPO(s), State(s), and providers of public transportation.

In 2017, the following three-pronged approach was cooperatively developed to address 23 CFR 450.314 (h). This approach provides a regular opportunity to review and update coordination methods as performance management activities occur, which offers an adaptable framework as performance-based planning and programming evolves.

- Agreement between the Iowa DOT and MPOs on applicable provisions through documentation included in each MPO's TPWP.
- Agreement between the Iowa DOT and relevant public transit agencies on applicable provisions through documentation included in each public transit agency's consolidated funding application.
- Agreement between each MPO and relevant public transit agencies on applicable provisions through documentation included in the appropriate cooperative agreement(s) between the MPO and relevant public transit agencies.

Inclusion of the following language in an MPO's TPWP, and that TPWP's subsequent approval by Iowa DOT, constitutes agreement on these items.

The Iowa DOT and ECIA agree to the following provisions. The communication outlined in these provisions between the MPO and Iowa DOT will generally be through the statewide planning coordinator in the Systems Planning Bureau.

1) Transportation performance data

- a. The Iowa DOT will provide MPOs with the statewide performance data used in developing statewide targets, and, when applicable, will also provide MPOs with subsets of the statewide data, based on their planning area boundaries.
- b. If MPOs choose to develop their own target for any measure, they will provide the Iowa DOT with any supplemental data they utilize in the target-setting process.

2) Selection of performance targets

- a. The Iowa DOT will develop draft statewide performance targets for FHWA measures in coordination with MPOs. Coordination may include in-person meetings, web meetings, conference calls, and/or email communication. MPOs shall be given an opportunity to provide comments on statewide targets and methodology before final statewide targets are adopted.
- b. If an MPO chooses to adopt their own target for any measure, they will develop draft MPO performance targets in coordination with the Iowa DOT. Coordination methods will be at the discretion of the MPO, but the Iowa DOT shall be provided an opportunity to provide comments on draft MPO performance targets and methodology prior to final approval.

3) Reporting of performance targets

- a. Iowa DOT performance targets will be reported to FHWA and FTA, as applicable. MPOs will be notified when Iowa DOT has reported final statewide targets.
- b. MPO performance targets will be reported to the Iowa DOT.
 - i. For each target, the MPO will provide the following information no later than 180 days after the date the Iowa DOT or relevant provider of public transportation establishes performance targets, or the date specified by federal code.
 1. A determination of whether the MPO is 1) agreeing to plan and program projects so that they contribute toward the accomplishment of the Iowa DOT or relevant provider of public transportation performance target, or 2) setting a quantifiable target for that performance measure for the MPO's planning area.
 2. If a quantifiable target is set for the MPO planning area, the MPO will provide any supplemental data used in determining any such target.
 3. Documentation of the MPO's target or support of the statewide or relevant public transportation provider target will be provided in the form of a resolution or meeting minutes.
- c. The Iowa DOT will include information outlined in 23 CFR 450.216 (f) in any statewide transportation plan amended or adopted after May 27, 2018, and information outlined in 23

CFR 450.218 (g) in any statewide transportation improvement program amended or adopted after May 27, 2018.

- d. MPOs will include information outlined in 23 CFR 450.324 (g) (3-4) in any metropolitan transportation plan amended or adopted after May 27, 2018, and information outlined in 23 CFR 450.326 (d) in any transportation improvement program amended or adopted after May 27, 2018.
- e. Reporting of targets and performance by the Iowa DOT and MPOs shall conform to 23 CFR 490, 49 CFR 625, and 49 CFR 673.

4) Reporting of performance to be used in tracking progress toward attainment of critical outcomes for the region of the MPO

- a. The Iowa DOT will provide MPOs with the statewide performance data used in developing statewide targets, and will also provide MPOs with subsets of the statewide data, based on their planning area boundaries.

5) The collection of data for the State asset management plans for the NHS

- a. The Iowa DOT will be responsible for collecting bridge and pavement condition data for the State asset management plan for the NHS.

STATEMENT OF CONTINUED VALIDITY

Cost Allocation Plan

The Cost Allocation Plan was approved by IDOT, FHWA, and the MPO in September of 1984.

The Cost Allocation Plan of ECIA is the basis of assigning costs to all projects during each fiscal year. Under the plan, the total costs assigned to each project are comprised of both direct and indirect costs. All direct and indirect costs are further identified as to personnel and non-personnel costs. The distinctions of cost allocation are described in the following definitions.

DEFINITIONS:

Direct Personnel Costs are costs of all personnel activities identifiable to specific projects. The primary example of Direct Personnel Costs includes personnel time spent on planning activities.

Direct Non-Personnel Costs are the costs of non-personnel items or service clearly incurred by specific projects. Direct non-personnel costs include project related items such as contracted services, data processing, project report publishing, reproductions, travel, supplies, reference materials, staff development, long-distance telephone calls, project audit fees, advertising, postage, memberships, and other costs similarly identifiable to specific projects.

Indirect Personnel Costs are costs of all personnel activities that are not identifiable to specific projects but support all project activities. Examples of Indirect Personnel Costs include personnel time spent on producing the Transportation Planning Work Program, policy meetings, and the agency's general and fiscal management.

Indirect Non-Personnel Costs are the costs of all non-personnel items or service that are not directly attributed to specific projects but rather are attributed to overall operation of the agency including all projects. Indirect non-personnel costs include such items as office rent, equipment rental, base telephone and overall agency long distance calls, postage, advertising, travel, staff development, insurance-bonds, office supplies, reproductions-publications, agency memberships, reference materials, agency audit, and other such costs similarly attributed to the total agency and all project support.

ECIA
FEDERAL TRANSIT ADMINISTRATION CIVIL RIGHTS ASSURANCE

The East Central Intergovernmental Association HEREBY CERTIFIES THAT, as a condition of receiving Federal financial assistance under the Urban Mass Transportation Act of 1964, as amended, it will ensure that:

1. No person, on the basis of race, color, or national origin will be subjected to discrimination in the level and quality of transportation services and transit-related benefits.
2. The East Central Intergovernmental Association will compile, maintain, and submit, in a timely manner, Title VI information required by FTA Circular 4702.1 and in compliance with the Department of Transportation's Title VI regulation, 49 CFR Part 21.9.
3. The East Central Intergovernmental Association will make it known to the public that those person or persons alleging discrimination on the basis of race, color, or national origin as it relates to the provision of transportation services and transit-related benefits may file a complaint with the Federal Transit Administration and/or the U.S. Department of Transportation.

The person or persons whose signature appears below are authorized to sign this assurance on behalf of the applicant or recipient.

ECIA CERTIFICATE OF INDIRECT COST PROPOSAL/INDIRECT COSTS

This is to certify that I have reviewed the indirect cost proposal submitted herewith and to the best of my knowledge and belief:

(1) All costs included in this proposal **December 17, 2023** to establish a:

- a. Cost Allocation Plan
- b. Indirect Cost Rate

for **January 1, 2025 – December 31, 2025** are allowable in accordance with the requirements of the Federal awards to which they apply and with Subpart E—Cost Principles of Part 200 as they apply to my:

- c. Governmental Organization
- d. Non-Profit Organization

(2) This proposal does not include any costs which are unallowable under Subpart E—Cost Principles of Part 200 such as (without limitation): public relations costs, contributions and donations, entertainment costs, fines and penalties, lobbying costs, and defense of fraud proceedings; and

(3) All costs included in this proposal are properly allocable to Federal awards on the basis of a beneficial or causal relationship between the expenses incurred and the Federal awards to which they are allocated in accordance with applicable requirements. Further, the same costs that have been treated as indirect costs have not been claimed as direct costs. Similar types of costs have been accounted for consistently.

Subject to the provisions of the Program Fraud Civil Remedies Act of 1986, (31 USC 3801 et seq.), and the Department of Labor's implementing regulations, (29 CFR Part 22), the False Claims Act (18 USC 287 and 31 USC 3729); and the False Statement Act (18 USC 1001), I declare to the best of my knowledge that the foregoing is true and correct.

(Signed by the official having the authority to negotiate indirect cost rates for the organization or by a higher level official.)

ECIA SELF-CERTIFICATION OF PROCUREMENT AND CONSULTANT SELECTION PROCEDURES

This is to certify that I have reviewed the [Iowa DOT Purchasing Rules](#) (Iowa Administrative Code 761, Chapter 20) and will ensure procurements or the selection of consultant firms for projects to be reimbursed with federal transportation planning funds will follow the policies and procedures outlined in the above-referenced purchasing rules.

Further, I certify that the following requirements will be adhered to for procurements and consultant services to be reimbursed with federal transportation planning funds.

- Capital expenditures, including the purchase of equipment, will be a separate line item in an approved Transportation Planning Work Program (TPWP) if the anticipated total cost exceeds \$5,000.
- An approved TPWP will specify that a project will involve consultant services prior to initiating the consultant selection process.
- Our agency will document the procedures utilized for the procurement or consultant selection, and will retain this documentation on file for a minimum of three years.
- When reimbursement is requested for capital expenditures or consultant services, we will provide our District Planner and the Systems Planning Bureau, through email or hard copy, invoices documenting the expenditure(s) at the time the associated reimbursement request is submitted.

I declare to the best of my knowledge and ability that we will adhere to the above requirements.

(Signed by the official having the authority to initiate procurements or consultant selection for the organization or by a higher level official.)
